Professional summary

DevSecOps and Cloud Security Engineer with hands-on experience in cybersecurity, network infrastructure, cloud environments, and secure software development workflows. Background includes AWS, Fortinet, Cisco, Palo Alto, Linux, Python automation, cyber risk management, and threat modeling. Delivers practical technical training in networking, traffic analysis, segmentation, and web application security.

Professional experience

DevSecOps and Cloud Security Engineer | Feb 2025 - Present

LumivantaX Teknoloji Çözümleri ve Danışmanlık Ltd. Şti. | İstanbul, Türkiye

- Contribute to security integration across development, deployment, and operational workflows.
- Support cloud security, access management, infrastructure security, and configuration practices.
- Contribute to application security improvements and products focused on cyber risk management and threat modeling.
- Support security automation and continuous improvement of engineering and operational processes.

Network and Cybersecurity Specialist | Mar 2024 - Mar 2025

ZERO1 Teknoloji A.Ş. | İstanbul, Türkiye

- Participated in corporate network design, management, security, and architecture optimization.
- Configured Fortinet firewalls, security policies, and access controls; worked with Cisco routing, VLANs, and ACLs.
- Prepared Cisco configurations in Linux environments and gained practical Palo Alto firewall experience.
- Supported AWS network configuration and migration; implemented network monitoring systems.
- Developed Python scripts for automation and configuration management.

Network and Information Security Intern | Jul 2023 - Sep 2023

Fuzul Ev Tasarruf Finansmanı A.Ş. | İstanbul, Türkiye

- Supported corporate and branch network deployment, Fortinet firewalls, VPNs, security policies, and access management.
- Assisted with branch connectivity planning, VoIP integration, traffic monitoring, and network device deployment.

Web Infrastructure & Digital Systems | 2021 - 2022

DijitalMM.com.tr - Dijital Mali Müşavirlik | Türkiye

- Deployed a WordPress corporate website and integrated domain, hosting, and corporate email services.
- Optimized website structure, themes, and content for usability.

IT Specialist Intern | Jun 2019 - Jul 2019

Acıbadem Sağlık Grubu | İstanbul, Türkiye

- Supported user access, system updates, incident tracking, technical documentation, and hardware inventory.
- Gained exposure to enterprise infrastructure, system administration, and information security practices.

Workshop Supervisor / Sales Consultant | 2018 - 2021

Decathlon Türkiye - Bicycle Department | İstanbul, Türkiye

- Managed bicycle maintenance and workshop operations, workload planning, and inventory.
- Provided technical customer support and prepared operational, maintenance, and sales reports.

Technical skills

- **DevSecOps:** Security integration, secure development lifecycle, security automation, CI/CD security practices.
- **Cloud & infrastructure:** AWS, Linux, infrastructure security, cloud security, access management.
- **Network security:** Fortinet, Palo Alto, Cisco, firewall policies, VPN, VLAN, routing, ACL.
- **Programming:** Python, Java, HTML, CSS.
- **Cybersecurity:** Cyber risk management, threat modeling, security monitoring, web application security.
- **Systems & tools:** Microsoft 365, Active Directory, WordPress, Raspberry Pi, Arduino, ESP32.

Technical training experience

Web Application Security | Çanakkale Onsekiz Mart University

Siber Kulüpler Birliği

- Delivered hands-on training in HTTP/HTTPS, web architecture, common vulnerabilities, and security testing, with practical application analysis exercises.

Network 101 / 102 / 103

- **Network 101:** OSI and TCP/IP models, TCP/UDP, IP addressing, Cisco Packet Tracer, and Fortinet fundamentals.
- **Network 102:** EVE-NG and Wireshark labs, traffic analysis, troubleshooting, NGFW concepts, and security monitoring.
- **Network 103:** VLAN configuration, segmentation, traffic isolation, and communication between segmented networks.

Portfolio projects

- **CASY / Caravan Aura System:** IoT project integrating energy and battery management, sensor monitoring, remote control, and automation for smart caravan living.
- **NomadMesh:** Offline mesh communication project using BLE discovery, Wi-Fi Direct, and store-and-forward messaging, designed for end-to-end encrypted communication in internet-unavailable and disaster scenarios.

Both projects were prepared for TÜBİTAK 2209 applications and IEEE-related work.

Certifications & training

- Certified Ethical Hacker (CEH).
- AWS Cloud Practitioner Essentials; AWS Partner: Accreditation (Technical).
- Fortinet FCF: Getting Started in Cybersecurity 2.0; Technical Introduction to Cybersecurity 1.0; Introduction to the Threat Landscape 2.0.
- Ruijie Certified Engineer (RCE) - Enterprise, 2024.
- System, Network and Security Training; Python; Web Design.

Education

- **Management Information Systems** - Işık University, İstanbul | 2019 - Present.
- **Web Design and Programming** - Anadolu University, Open Education Faculty | 2021 - 2022.

Leadership & organizations

Heybeliada Leo Club - Club President; Işık University Photography Club - Club President; IşıkFoto Community - Board Member; İŞÜMED - Member.
